DETAILED ACTION

1. Applicant's election without traverse of Group II, claims 16-38, in Paper No. 12 is acknowledged. It is noted this office action is requiring an additional species restriction requirement as it is unclear which claims are generic and which claims are directed to a particular species, particularly in view of co-pending application, 10/193,661, disclosing Species I (Figures 1-3) and containing claims nearly identical to claims 17 and 18 of this application. Applicant is advised to maintain a clear line of demarcation between this application and 10/193,661.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I (Figures 1-3) directed to welding the cut pieces by using a mechanism comprising a strip of heating elements, i.e. welding does not occur by a plurality of spaced apart nips.

Species II (Figures 4-14) directed to welding the thermoplastic strips using at least a first mechanism comprising a strip of heating elements and at the same time with a second mechanism comprising rolling elements, i.e. welding occurs by a plurality of spaced apart nips.

If Species II is elected the following sub-species election is required:

Species II-A (Figures 4-13) directed to a carrying mechanism that rotates.

Species II-A (Figure 14) directed to a carrying mechanism that translates.

Art Unit: 1733

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. A telephone call was made to James Witherspoon on 8/6/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1733

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **703-305-7481**. The examiner can normally be reached on M-Th (8 - 5) and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on 703-308-2058.
